SOFTWARE PROJECTS

Trader Nest | Solo Project | Developer | [Live](#) | [Github](#)

- Built an online stock tracking app, Trader Nest, developed using the MERN stack
- Implemented user authentication and authorization by using Bcryptjs for password encryption and decryption and express-session for handling user sessions
- Integrated the Finnhub API to grab stock information from tickers

DaMaFe Movies | Group Project | Developer | [Live](#) | [Github](#)

- Built an online movie review platform, DaMaFe movie theater, developed using the MERN stack
- Implemented user authentication and authorization by using Bcryptjs for password encryption and decryption and express-session for handling user sessions
- Integrated the OMDb API to grab movie information from search terms

Chat Box | Solo Project | Developer | [Live](#) | [Github](#)

- Developed a chat application with user authentication and real-time communication using Node.js, Express, Socket.io, Passport, Bcrypt, and MongoDB
- Implemented CRUD operations and the ability to create, join, edit, and delete chat rooms with unique codes
